

## **Winter term 2025/2026**

### **Challenges to Democracy**

*Version: November 7, 2025*

#### **Seminar Date and Format**

The seminar is scheduled every week on Wednesday from 14:00 to 16:00 (c.t.). The first session takes place on 15 October 2025 and the final session will be held on 28 January 2026. The seminar is open to undergraduate students, the course language is English. The seminar takes the form of a ‘Lektürekurs’ which is heavy on literature (every week two empirical articles). No prior knowledge is needed. Credits can only be granted if participants read and engage with the readings before the seminar and pass the seminar requirements.

#### **Course Overview**

The seminar seeks to analyse the current challenges democratic regimes face. It is structured along four blocks. In the first block, we will learn about the essential features of a democracy and discover what shapes the quality of democracy. Moreover, we will introduce essentials of comparative research designs. In a second block, we will engage with different empirical analyses of the current state of democratization and democratic systems. We will zero in on how institutions are sidelined; how actors, such as far-right parties, challenge democracies; and how democracy is threatened by crises. In the third block, we will look at potential solutions and scenarios of how democracy could cope with the current challenges. This block also involves the invitation of a practitioner who will visit the class to discuss their experience with democratic innovations. In the final block, students get the opportunity to present research ideas for their term paper.

## Learning Outcomes

At the end of the course, you have been introduced to key concepts in democratization and democratic backsliding. You will learn about how democracies are defined and what determines the quality of democracies. Empirically, you will have acquired an understanding of the current state of democratic systems around the world. Further, you will have learnt about different threats to democracy – both coming from the inside and outside. Finally, you will be able to critically evaluate potential solutions to the problems democracies are facing. Through reading and application, you will get a glimpse on different methodological approaches to assess democratic quality and its challenges. Further, you will have learned how to collect, analyse, summarise and present your own empirical data.

The goal of the individual sessions is to offer you different perspectives on how to study democracy. While being exposed to these different sub-dimensions will give you a basic insight into the discipline, what you will have learnt is invariably linked to your own interests, so your input in the seminar shapes your individual learning outcomes.

## Requirements

The amount of credits granted depends on the programme you are enrolled in. Keep in mind that each ECTS amounts to about 30 hours of working time. According to the evaluation regulations, a ‘Lektürekurs’ with ‘Prüfungsleistung’ amounts to 150 working hours.

- |   |             |
|---|-------------|
| • regular attendance and active participation in discussion | 30 hours    |
| • questions on two empirical articles                       | } 120 hours |
| • podcast project   |             |
| • term paper (graded)                                       |             |

## Attendance and Questions on the Readings

Students should regularly attend the seminar. In case you miss a session, please inform me about your absence. Attendance requires active participation in class which presumes careful reading of the literature. This is a reading-intense seminar; each session is based on at least two readings. The readings are usually below 50 pages but require a thorough read.

When reading the empirical paper: There are different reading techniques but most require multiple runs for a paper (cf. Keshav). You should always take notes – either during or directly after reading the text. Focus on the core message of the author. Try to identify the puzzle and the question an author presents, their arguments, and the general methodological approach (for a first read, do not get lost on details!). Then always ask yourself whether you can follow the argumentation. On which point do you disagree and why? Once you are able to summarize the core idea of a paper within two minutes, you are ready to go. If you have problems in understanding the text, write them down and we'll clarify them in class.

For two sessions of your choice (except for weeks 1-2, 5, 12-14), you are asked to write down two questions about the readings. The questions must be submitted by Monday, 23:59, in the preceding week of the respective session. The questions can be informed by the questions you had on the readings but should not be comprehension questions about the text (these can and should be raised separately in class). For instance, while your written questions should not ask what the main results of the article are, you could question the consistency of a theoretical argument made in the paper, the fit between theory and research design or the wider implications of a research finding for a democracy, the policy-making process etc. Each question should clearly relate to an article which was assigned for the class. Please ensure your attendance in the respective session, as you might need to introduce your question to the class and moderate a discussion on the question.

### **Podcast project**

In small groups of 4-5 people, you are asked to work on a small podcast project. The podcast should be no longer than 10 minutes in length. Everyone in the group needs to participate – at the end of the project, you need to break down who did what. This implies that some of you may focus on the empirical analysis, others may interview people on the streets and others create the final project/presentation. You can record citizens and yourself with your mobile device. If you want, you can edit the recordings using Shotcut, a free editing software offered by the University of Münster (here's a short tutorial). However, it is totally fine just to present your empirical findings and play supporting interviews in the session. In other words, do not worry about the technical realization of your podcast.

The aim of the project is to develop a question about the quality of democracy. We will initiate this in the third session when we talk about different indices to measure the state of

democracy. Our session on 12 November 2025 will give you additional information on how to collect empirical evidence on the state of democracy in a country. In addition to your prepared information on a certain aspect of democracies, you are asked to go on the streets of Münster surveying citizens about their experiences with democracy. What you want to ask them is entirely up to you. Some questions which may guide your podcast could be:

- What does *democracy* mean to you?
- When you think about the future of democracy, what comes into your mind?
- Are there certain things you would like to change about how our democracy currently works?
- Do you think there are any threats to our current democracy, if yes, which ones?

These questions should be tailored to the research question you choose.

The podcast need to be submitted by Monday, 01 December, and will be presented in the first half of our session in week 8.

## **Research Paper**

In case you need a grade, you are supposed to sketch a research design for a further investigation of one of the topics we covered (6,000 words  $\pm$  10%, font size 11/12, 1.5 spacing, justified text, margins 2.5cm). Please list the number of words on your title page. The research paper is due 31 March.

In your term paper, you are asked to apply the knowledge you have learnt in previous sessions. The research paper should follow the basic structure of an academic paper – except for the analysis. Hence, your academic paper should start with a research puzzle (some empirical phenomenon which cannot be explained by existing work), introduce the specific research question and motivate why it is important to examine this question. You should then review the existing literature on which base you develop your own theoretical framework formulating research hypotheses. In the data and methods section, you are expected to describe your analytic approach. You are not required to implement the analysis. Instead, after presenting your research design, you will give a brief outlook on how to pursue in the future, including an honest evaluation of strengths and challenges of your design.

## Plagiarism

Plagiarism and ghostwriting are forbidden. Written assignments may be checked for plagiarism using the plagiarism software Turnitin.

Students are required to use referenced work in their assignments with proper documentation and citation. To facilitate the citation workflow and prepare for future assignments in the programme, students are encouraged to use reference software. Students can use the open-source software Zotero free of charge. When in doubt about proper citation, please refer to the Leitlinien zum wissenschaftlichen Arbeiten provided by the Department of Political Science.

You need to be transparent about the usage of AI tools at the end of your submitted writings (Which tools did you use? Which prompts did you issue?). AI can be a helpful tool for coding, language editing and information retrieval. Still, please keep in mind that you are expected to submit original work which is based on your *own* ideas. Your creative process can be assisted by AI tools. However, you need to attach a complete list of prompts you used during your research as an appendix to your manuscript. If you fail to be transparent, you'll fail the class.

## Inclusiveness

To promote inclusiveness, the seminar instructor uses gender-inclusive language (on why this may be helpful: Pérez and Tavits 2019; Vervecken, Hannover, and Wolter 2013). Participants are invited to share their pronouns with the class. For a dynamic feedback culture, students are encouraged to regularly submit (anonymous) feedback via LamaPoll or by sending me a mail.

### **Week 1: Introduction [15 October 2025]**

There is no need to prepare anything from your side. We will talk about the structure of the seminar, expectations and your pre-knowledge on the issue.

### **Week 2: Research Design [22 October 2025]**

In this session, we will discuss the method of comparison in political science and explore key elements of political science literature.

#### **Main readings**

## **Week 10: Solutions – Performance and Resilience [17 December 2025]**

After having engaged with multiple threats to democracy, in the next block, we will focus on potential solutions. In the first session, we will discuss how government performance contribute to diffuse and specific support for democracy. Moreover, we will deal with the role of minorities in bolstering democratic resilience.

### **Compulsory readings**

1. **Magalhães PC** (2014) Government Effectiveness and Support for Democracy. *European Journal of Political Research* **53** (1), 77–97. DOI: 10.1111/1475-6765.12024

## **Week 12: Solutions – Visit by ‘Hansaforum’ [14 January 2026]**

In this session, we will meet the team of the ‘Hansaforum’, a local group of volunteers who organized a local citizen project for co-determination. The session will be held during the regular hours in the seminar room.

Read more about their work here.

## **Week 13: Student Presentations I [21 January 2026]**

At the end of the seminar, you are supposed to draft a research design in your term paper. In this session, you should pitch your preliminary idea to your class mates to obtain valuable feedback.

**Week 13: Student Presentations II [28 January 2026]**

At the end of the seminar, you are supposed to draft a research design in your term paper. In this session, you should pitch your preliminary idea to your class mates to obtain valuable feedback. In addition, we will do a reflection on the seminar.
